

# Canberra Bicycle Museum Collection

The Canberra Bicycle Museum has closed, permanently. To make way for upcoming refurbishments, the stock needs to be moved.

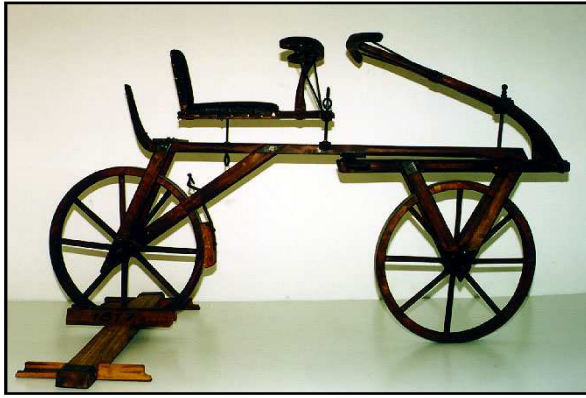

Out of the collection of seven hundred bikes, most of the bikes have already gone to good homes, and collectors and enthusiasts around the country were pleased to acquire them.

The following pages show photos and descriptions of the best of the collection. These bikes represent the history of bicycles from 1817 to the present day. Some posters and memorabilia items are also available. The owner of the collection is The Tradies Club, and the Board of Directors would dearly love to see this core collection remain together..
